## **DETAILED ACTION**

### ***Response to Amendment***

1. Amendment filed October 15, 2002 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Priority***

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Drawings***

4. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on October 15, 2002 have been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.
5. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "male and female thread have a thread diameter" recited in claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Art Unit: 3752

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

6. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the male and female thread have a diameter" in lines 6-7. It is uncertain whether each have a diameter or they share a diameter. It is uncertain which diameter is being claimed.

Claim 1 recites the limitation "+/- 20% of \_\_\_\_" throughout the claims. Such a recitation does not appear to indicate a baseline dimension. For example, a recitation of +/- 20% of 1.1mm indicates +/- 0.022mm but fails to identify +/- 0.022mm of what baseline dimension.

***Claim Rejections - 35 USC § 103***

7. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lewis et al. (6,250,567) in view of Kubis (4,906,151).

Lewis et al. discloses a spray gun comprising: a gun body 14; an air nozzle ring 18; a trapezoid thread 51.

Art Unit: 3752

Lewis et al. does not disclose paint. The device of Lewis is for spraying single or multicomponent material such a polyurethane. The device of Lewis is not precluded from spraying paint. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have provided paint to the device of Lewis et al. for a painted finish.

Additionally, Lewis et al. does not disclose the ranges of flank angle, thread height, root to crest clearance, flank clearance, pitch, core diameter and outer diameter tolerance, pitch tolerance, nominal diameter. Such parameters are known parameters of a trapezoid thread. Kubis discloses male and female trapozodial threads in figure 2 defining the diameters, thread height, root to crest clearance and flank clearance. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided claimed ranges/values for optimization dependent on application criteria, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

### ***Response to Arguments***

8. Applicant's arguments filed October 15, 2002 have been fully considered but they are not persuasive. In response to applicant's argument that motivation is lacking, motivation has been cited in the prior Office action and in this Office action as optimization dependent on application criteria. One of ordinary skill in the art would

Art Unit: 3752

recognize to optimize these parameters for desired mating characteristics such as mating pressure and fit.

### ***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
